2019 Website Program Description

“This program is an important addition to TMI’s offerings. The communication skills you learn operate across the spectrum from physical beings to non-physical.”

With Nancy Windheart (www.nancywindheart.com)

“Telepathic communication is an opening of all of our sensitive internal and external “receivers” to understand another beings’ viewpoint, energy, perspective, and wisdom. As we hone this **natural, inborn ability**, we learn to differentiate between thoughts, ideas, and perceptions that come from our human perspective, our analytical/logical mind, and our preconceptions, judgments, and beliefs, from those which come directly, in connection, resonance, and union, with those who share different expressions of form, life, and awareness.“
